LinkedIn: My LinkedIn Profile

Profile

I am a driven and innovative developer with a passion for building high-quality mobile applications and 2+ years of hands-on experience. I focus on clean architecture, efficient state management, and delivering intuitive and polished user experiences.

Skills

- Flutter & Dart (Advanced).
- Provider state management for scalable UI architecture.
- RESTful API integration and data modelling.
- Firebase Authentication, Firestore & Cloud Storage.
- Pixel-perfect UI implementation from Figma.
- Strong understanding of OOP principles
- Git & GitHub for version control and collaboration
- Agile/Scrum development experience.
- Strong teamwork, communication, and problem-solving ability.

Experience

ECHOLIF TECHNOLOGIES / Mobile Applications Developer

- ECHOLIFT
MAY 2024 - PRESENT

Developing a mobile app that enables users to schedule item donations for charity organizations, with pickup and delivery to designated drop-off stations. The app streamlines the donation process, connecting donors with charities to ensure efficient and reliable delivery of essential items to those in need.

- ECHOLIFT AMBASSADORS
MAY 2024 - PRESENT

Building an Ambassador app for charity organizations, enabling Ambassadors to manage donations, coordinate with drivers and donors, and customize their charity's public-facing page to enhance donor engagement and streamline donation logistics.

MASTERCLASS TECH/ Freelance Mobile Developer

- GYM BUDDY

Collaborated with a team to develop Gym Buddy, a mobile app that connects fitness enthusiasts with similar goals. Users can search for workout partners, add them as buddies, and chat within the app to stay motivated, share progress, and schedule workouts. The app promotes accountability and community among users working toward their fitness objectives.

HORIZON INFO LABS / Freelance Mobile Developer

- PACIFIC MOBILE
JULY 2024 - SEPTEMBER 2024

Collaborated with a team to develop a mobile app for a hospital equipment manufacturing company that facilitates the management and processing of maintenance requests from hospitals using their devices, such as heart rate monitors and other large machines.

ACCRA INSTITUTE OF TECHNOLOGY / Internship
FEBRUARY 2024 - MAY 2024

During my internship at Accra Institute of Technology, I assisted with mobile application projects, supported testing and quality assurance, and gained valuable insights into the app development process and team collaboration.
